

## INTERNATIONAL SEARCH REPORT

International Application No

PCT/NL2005/000137

A. CLASSIFICATION OF SUBJECT MATTER  
IPC 7 A61L9/12 F24F3/16

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 A61L F24F

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ

## C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	WO 97/42983 A (JOHNSON & SON INC S C) 20 November 1997 (1997-11-20)  page 9, line 13 - line 15; claims 1-8; figures 1-8	1-21, 28-35, 41,42
X	US 5 875 968 A (MARTIN JOHN ET AL) 2 March 1999 (1999-03-02) claims 1-10; figures 1-8	1,31
X	US 4 387 849 A (VAN LOVEREN ET AL) 14 June 1983 (1983-06-14) column 3, line 10 - line 48 column 5, line 39 - column 6, line 42 column 9, line 62 - column 10, line 58 column 13, line 6 - line 15; figures ----- -/--	1,31, 37-40,42

☒ Further documents are listed in the continuation of box C.☒ Patent family members are listed in annex.

## \* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document relating to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

## INTERNATIONAL SEARCH REPORT

International application No.  
PCT/NL2005/000137**Box II Observations where certain claims were found unsearchable (Continuation of Item 2 of first sheet)**

IAP5 Rec'd PCT/PTO 25 AUG 2006

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:  
because they relate to subject matter not required to be searched by this Authority, namely:
  
2. ☒ Claims Nos.: 52, 58, 59  
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:  
see FURTHER INFORMATION sheet PCT/ISA/210
  
3. ☐ Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

**Box III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)**

This International Searching Authority found multiple inventions in this international application, as follows:

see additional sheet

1. ☐ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
  
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
  
3. ☒ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:  
1-42, 53-57
  
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☒ No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box II.2

Claims Nos.: 52,58,59

Claim 52 has no technical features. Claims 58 and 59 refer to the description and drawings without further specification of relevant technical features. Hence, for these claims a meaningful search is impossible.

The applicant's attention is drawn to the fact that claims relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure. If the application proceeds into the regional phase before the EPO, the applicant is reminded that a search may be carried out during examination before the EPO (see EPO Guideline C-VI, 8.5), should the problems which led to the Article 17(2) declaration be overcome.

## FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-42

Assembly of a body including an agent discharging an active gaseous substance, and a first holder having an accommodation space for the body and having a first wall being at least partially made of transparent or translucent material; and a holder for such an agent comprising a front wall and rear wall, whereby the front wall is at least partially made of transparent and translucent material.

---

2. claims: 43-50

Assembly of a body including an agent discharging an active gaseous substance, and a first holder having an accommodation space for the body, the body formed by a second holder having walls wherein at least one wall is made of a material moistenable by the liquid agent, whereby the wall prior to use is closed off by a covering layer provided with stripping means extending beyond the first holder.

---

3. claim: 51

Assembly of a body including an agent discharging an active gaseous substance, and a first holder having an accommodation space for the body, the body formed by a second holder having walls wherein at least one wall is made of a material moistenable by the liquid agent, wherein the second holder has a lip and the first holder has a passage allowing the second holder to be passed through

---

4. claims: 53-57

Assembly of a body including an agent discharging an active gaseous substance, and a first holder having an accommodation space for the body, wherein the first holder comprises two attachable parts made of different material.

---
